the relationship between medieval animal symbolism and the iconography of animals in the renaissance has scarcely been studied filling a gap in this significant field of renaissance culture in general and its art in particular this book demonstrates the continuity and tenacity of medieval animal interpretations and symbolism disguised under the veil of genre religious or mythological narrative and scientific naturalism an extensive introduction dealing with relevant medieval and early renaissance sources is followed by a series of case studies that illustrate ways in which renaissance artists revived conventional animal imagery in unprecedented contexts investing them with new meanings on a social political ethical religious or psychological level often by applying exegetical methodology in creating multiple semantic and iconographic levels brill s studies on art art history and intellectual history vol 2

from acclaimed economists george akerlof and robert shiller the case for why government is needed to restore confidence in the economy the global financial crisis has made it painfully clear that powerful psychological forces are imperiling the wealth of nations today from blind faith in ever rising housing prices to plummeting

confidence in capital markets animal spirits are driving financial events worldwide in this book acclaimed economists george akerlof and robert shiller challenge the economic wisdom that got us into this mess and put forward a bold new vision that will transform economics and restore prosperity akerlof and shiller reassert the necessity of an active government role in economic policymaking by recovering the idea of animal spirits a term john maynard keynes used to describe the gloom and despondence that led to the great depression and the changing psychology that accompanied recovery like keynes akerlof and shiller know that managing these animal spirits requires the steady hand of government simply allowing markets to work won't do it in rebuilding the case for a more robust behaviorally informed keynesianism they detail the most pervasive effects of animal spirits in contemporary economic life such as confidence fear bad faith corruption a concern for fairness and the stories we tell ourselves about our economic fortunes and show how reaganomics thatcherism and the rational expectations revolution failed to account for them animal spirits offers a road map for reversing the financial misfortunes besetting us today read it and learn how leaders can channel animal spirits the powerful forces of human psychology that are afoot in the world economy today in a new preface they describe why our economic troubles may linger for some time unless we are prepared to take further decisive action

several books chronicle attempts most of them during the last 40 years to teach animals to communicate with people in a human designed language these books have typically treated only one or two species or even one or a few research projects we have provided a more encompassing view of this field we also want to reinforce what other authors for example jane goodall sue savage rumbaugh penny patterson birute galdikas and roger and deborah fouts so passionately convey about our responsibility for our closest animal kin this book surveys what was known or believed about animal language throughout history and prehistory and summarizes current knowledge and the controversy around it the authors identify and attempt to settle most of the problems in interpreting the animal behaviours that have been observed in studies of animal language ability

this volume presents barbara hannah's jung institute lectures of 1954-58 in these profound talks she speaks of the archetypal symbolism of seven animals cat dog horse serpent lion bull and cow discussing their roles in the psychological and cultural life of the west

in creature discomfort fauna criticism ethics and the representation of animals in spanish american fiction and poetry scott m devries uncovers a tradition in spanish american literature where animal ethical representations anticipate many of the most pressing concerns from present debates in animal studies the author documents moments from the corpus that articulate long standing positions such as a defense of animal rights or advocacy for liberationism that engage in literary philosophical meditations concerning mind theory and animal sentience and that anticipate current ideas from critical animal studies including the rejection of hierarchical differentiations between the categories human and nonhuman creature discomfort innovates the notion of fauna criticism as a new literary approach within animal studies this kind of analysis emphasizes the reframing of literary history to expound animal ethical positions from literary texts both those that have been considered canonical as well as those that have long been neglected in this study devries employs fauna criticism to examine nonhuman sentience animal interiority and other ethical issues such as the livestock and pet industries circuses zoos hunting and species extinction in fictional narrative and poetry from the nineteenth century modernista regional indigenista and contemporary periods of spanish american literature

the sixth mass extinction or anthropocene extinction is one of the most pervasive issues of our time animals plants and afterimages brings together leading scholars in the humanities and life sciences to explore how extinct species are represented in art and visual culture with a special emphasis on museums engaging with celebrated cases of vanished species such as the quagga and the thylacine as well as less well known examples of animals and plants these essays explore how representations of recent and ancient extinctions help advance scientific understanding and speak to contemporary ecological and environmental concerns

the landmark text about the inner workings of the unconscious mind from the symbolism that unlocks the meaning of our dreams to their effect on our waking lives and artistic impulses featuring more than a hundred updated images that break down carl g jung s revolutionary ideas what emerges with great clarity from the book is that jung has done immense service both to psychology as a science and to our general understanding of man in society the guardian our psyche is part of nature and its enigma is limitless since our inception humanity has looked to dreams for guidance but what are they how can we understand them and how can we use them to shape our lives there is perhaps no one more equipped to answer these questions than the legendary psychologist carl g jung it is in his life s work that the unconscious mind comes to be understood as an expansive rich world just as vital and true a part of the mind as the conscious and it is in our dreams those personal integral expressions of our deepest selves that it communicates itself to us a seminal text written explicitly for the general reader man and his symbols is a guide to understanding our dreams and interrogating the many facets of identity our egos and our shadows the dark side of our natures full of fascinating case studies and examples pulled from philosophy history myth fairy tales and more this groundbreaking work profusely illustrated with hundreds of visual examples offers invaluable insight into the symbols we dream that demand understanding why we seek meaning at all and how these very symbols affect our lives armed with the knowledge of the self and our shadow we may build fuller more receptive lives by illuminating the means to examine our prejudices interpret psychological meanings break free of our influences and recenter our individuality man and his symbols proves to be decades after its conception a revelatory absorbing and relevant experience

this book discusses how we can inspire today s youth to engage in challenging and productive discussions around the past present and future role of animals in science education animals play a large role in the sciences and science education and yet they remain one of the least visible topics in the educational literature this book is intended to cultivate research topics conversations and dispositions for the ethical use of animals in science and education this book explores the vital role of animals with in science education specimens protected species and other associated issues with regards to the role of animals in science topics explored include ethical curriculum and pedagogical dimensions involving invertebrates engineering solutions that contribute to ecosystems the experiences of animals under our care aesthetic and contemplative practices alongside science school based ethical dialogue nature study for promoting inquiry and sustainability the challenge of whether animals need to be used for science whatsoever reconceptualizing museum specimens cultivating socioscientific issues and epistemic practice cultural integrity and citizen science the care and nurturance of gender balanced curriculum choices for science education and theoretical conversations around cultivating critical thinking skills and ethical dispositions the diverse authors in this book take on the logic of domination and symbolic violence embodied within the scientific enterprise that has systematically subjugated animals and nature and emboldened the anthropocentric and exploitative expressions for the future role of animals at a time when animals are getting excluded from classrooms too dangerous too many allergies too dirty this book is an important

this book examines the works of major artists between the seventeenth and nineteenth centuries as important barometers of individual and collective values toward non human life once viewed as merely representational these works can also be read as tangential or morally instrumental by way of formal analysis and critical theories chapter two demonstrates the discrimination toward large and small felines in genesis and the book of revelation chapter three explores the cruel capture of free roaming animals and how artists depicted their furs feathers and shells in costume as symbols of virtue and vice chapter four identifies species beliefs between donkeys and horses chapter five explores the altered dutch kitchen spaces and disguised food animals in various culinary constructs in still life painting chapter six explores the animal substances embedded in pigments chapter seven examines animals in absentia in the crafting of brushes the book concludes with the fish paintings of william merritt chase whose glazing techniques demonstrate an artistic approach that honors fishes as sentient beings

all animals are equal but some animals are more equal than others it s just an ordinary farm until the animals revolt they get rid of the irresponsible farmer the other animals are sure that life is improving but as systems are replaced and half truths are retold a new hierarchy emerges orwell s tale of propaganda power and greed has never felt more pertinent with an exciting new cover and inside illustrations by superstar chris mould

this book begins with the assumption that the presence of non human creatures causes an always already uncanny rift in human assumptions about reality exploring the dark side of animal nature and the otherness of animals as viewed by humans and employing cutting edge theory on non human animals eco criticism literary and cultural theory this book takes the gothic genre into new territory after the dissemination of darwin s theories of evolution nineteenth century fiction quickly picked up on the idea of the animal within here the fear explored was of an unruly defiant degenerate and entirely amoral animality lying mostly dormant within all of us however non humans and humans have other sorts of encounters too and even before darwin humans have often had an uneasy relationship with animals which as donna haraway puts it have a way of looking back at us in this book the focus is not on the animal within but rather on the animal with out other and entirely incomprehensible

how do our senses help us to understand the world this question which preoccupied enlightenment thinkers also emerged as a key theme in depictions of animals in eighteenth century art this book examines the ways in which painters such as chardin as well as sculptors porcelain modelers and other decorative designers portrayed

animals as sensing subjects who physically confirmed the value of material experience the sensual style known today as the rococo encouraged the proliferation of animals as exemplars of empirical inquiry ranging from the popular subject of the monkey artist to the alchemical wonders of the life sized porcelain animals created for the saxon court examining writings on sensory knowledge by la mettrie condillac diderot and other philosophers side by side with depictions of the animal in art cohen argues that artists promoted the animal as a sensory subject while also validating the material basis of their own professional practice

under the title of this book it is proposed to describe and illustrate only those fictitious and symbolic creatures which appear in british heraldry the list will include all those beings of whose existence we have not the direct evidence of our senses and those exaggerations and combinations of natural forms which have been adopted in the system of symbolic heraldry handed down to us from the middle ages many of the ideas of the writers of that period were undoubtedly derived from still earlier sources namely classic story sacred and legendary art and the marvellous tales of early travellers others were the coinage of their own fancies and their fears as these unreal beings are constantly met with in symbolic art of which heraldry is the chief exponent it may be assumed that they have been adopted in each case with some obvious or latent meaning as in the case of real animals they may therefore equally lay claim to our consideration as emblems or types more especially as less attention has been devoted to them and the delineation of their forms by competent artists the writer has been led into considering and investigating the subject with some degree of attention from finding the frequent need of some reliable authority both descriptive and artistic such as would enable anyone to depict with accuracy and true heraldic spirit the forms and features of these chimerical beings

the intersection of race and species has a long and problematic history western thinking specifically has demonstrated a societal need to try to conceive of race as a purely biological fact rather than a social construct this book is an academic activist challenge to that instinct prioritizing anti racism in its observation of the animal race intersection too often as b n dicte boisseron has indicated this intersection typically appears in the form of animal activists instrumentalizing racial discrimination as a vehicle to approach animal rights but why does this intersection exist and perhaps more importantly how can we challenge it moving forward this volume examines those two critical questions taking an interdisciplinary approach in moving across subjects including art history film studies american history and digital media analysis our interpretation of animals has for centuries been fundamental in the development of western race thinking this collection of essays looks at how this perspective contributes to the construction of racial discrimination prioritizing ways to read the animal in our culture as a means for working to dismantle this conception

this textbook provides a full overview of human animal studies it focuses on the conceptual construction of animals in american culture and the way in which it

the animal that therefore i am is the long awaited translation of the complete text of jacques derrida s ten hour address to the 1997 cérisy conference entitled the autobiographical animal the third of four such colloquia on his work the book was assembled posthumously on the basis of two published sections one written and recorded session and one informal recorded session the book is at once an affectionate look back over the multiple roles played by animals in derrida s work and a profound philosophical investigation and critique of the relegation of animal life that takes place as a result of the distinction dating from descartes between man as thinking animal and every other living species that starts with the very fact of the line of separation drawn between the human and the millions of other species that are reduced to a single the animal derrida finds that distinction or versions of it surfacing in thinkers as far apart as descartes kant heidegger lacan and levinas and he dedicates extended analyses to the question in the work of each of them the book s autobiographical theme intersects with its philosophical analysis through the figures of looking and nakedness staged in terms of derrida s experience when his cat follows him into the bathroom in the morning in a classic deconstructive reversal derrida asks what this animal sees and thinks when it sees this naked man yet the experiences of nakedness and shame also lead all the way back into the mythologies of man s dominion over the beasts and trace a history of how man has systematically displaced onto the animal his own failings or bêtises the animal that therefore i am is at times a militant plea and indictment regarding especially the modern industrialized treatment of animals however derrida cannot subscribe to a simplistic version of animal rights that fails to follow through in all its implications the questions and definitions of life to

how should we treat non human animals in this immensely powerful and influential book now with a new introduction by sapiens author yuval noah harari the renowned moral philosopher peter singer addresses this simple question with trenchant dispassionate reasoning accompanied by the disturbing evidence of factory farms and laboratories his answers triggered the birth of the animal rights movement an

extraordinary book which has had extraordinary effects widely known as the bible of the animal liberation movement independent on sunday in the decades since this landmark classic first appeared some public attitudes to animals may have changed but our continued abuse of animals in factory farms and as tools for research shows that the underlying ideas singer exposes as ethically indefensible are still dominating the way we treat animals as yuval harari s brilliantly argued introduction makes clear this book is as relevant now as the day it was written

story of the bible animals is a book by j g wood it provides a description of the habits and uses of every living creature mentioned in christian scriptures

early nineteenth century british literature is overpopulated with images of dead and deadly animals as chase pielak observes in his study of animal encounters in the works of charles and mary lamb john clare samuel taylor coleridge lord byron and william wordsworth these encounters pielak suggests coincide with anxieties over living alongside both animals and cemeteries in the late eighteenth and early nineteenth centuries pielak traces the linguistic physical and psychological interruptions occasioned by animal encounters from the heart of communal life the table to the countryside and finally into and beyond the wild cemetery he argues that romantic period writers use language that ultimately betrays itself in beastly disruptions exposing anxiety over what it means to be human what happens at death the consequences of living together and the significance of being remembered extending his discussion past an emphasis on animal rights to an examination of animals in their social context pielak shows that these animal representations are both inherently important and a foreshadowing of the ways we continue to need images of dead and deadly romantic beasts

a true classic of world literature a masterpiece that has inspired generations of writers in nigeria across africa and around the world barack obama african literature is incomplete and unthinkable without the works of chinua achebe toni morrison nominated as one of america s best loved novels by pbs s the great american read things fall apart is the first of three novels in chinua achebe s critically acclaimed african trilogy it is a classic narrative about africa s cataclysmic encounter with

Europe as it establishes a colonial presence on the continent told through the fictional experiences of Okonkwo, a wealthy and fearless Igbo warrior of Umuofia in the late 1800s. *Things Fall Apart* explores one man's futile resistance to the devaluing of his Igbo traditions by British political and religious forces and his despair as his community capitulates to the powerful new order. With more than 20 million copies sold and translated into fifty-seven languages, *Things Fall Apart* provides one of the most illuminating and permanent monuments to African experience. Achebe does not only capture life in a pre-colonial African village; he conveys the tragedy of the loss of that world while broadening our understanding of our contemporary realities.
